

Anionic Dry Solve 9540

Safety Data Sheet

Date Issued: 04/13/2013
Date Revised: 04/13/2013

1. CHEMICAL PRODUCT AND COMPANY IDENTIFICATION

PRODUCT NAME: **SOLVE 9540**
COMPANY: WaterSolve, LLC, 5031 68th Street, Caledonia, Michigan 49316, USA
For Product information call 616-575-8693.
For Chemical Emergency Spill, Leak, Fire, Exposure, or Accident
Call CHEMTREC Day or Night
Within USA and Canada: 1-800-424-9300
Outside USA and Canada: +1 703-527-3887 (collect calls accepted)

2. HAZARDS IDENTIFICATION

Emergency Overview

Spilled product in contact with water or moisture causes surfaces to become extremely slippery. This product is not classified as a hazard by OSHA.

Potential Health Effects Eyes: Product is not an irritant.

Potential Health Effects Skin: Product is not a skin irritant.

Potential Health Effects Ingestion: Ingestion –May be harmful if swallowed. Seek medical attention.

Potential Health Effects: Remove to fresh air. This product is a dust. Inhalation of dusts can cause respiratory irritation. Use appropriate personal protection equipment when using this product.

Medical Conditions Aggravated by Exposure:

Since this product is a dust, any respiratory problem may become acute if dust is inhaled. Use appropriate respiratory breathing apparatus as needed.

HMIS Ratings: Health: 1 Fire: 0 Reactivity 0 Personal Protections: B
Hazard Scale: 0=minimal 1=slight 2=moderate 3=serious 4=severe *=chronic hazard

3. COMPOSITION/INFORMATION ON INGREDIENTS

CAS#	Component
25085-02-3	2-Propenoic acid, sodium salt, polymer with 2-propenamide

Component Information on Non-Hazardous Components

The manufacturer lists no ingredients as hazardous according to OSHA, 29CFR 1910.1200.
Components are listed on TSCA (40 CFR 700).

4. FIRST AID MEASURES

Skin Contact: Flush thoroughly with water and soap. Take off contaminated clothing and wash thoroughly before reuse.

Eye Contact: Immediately flush eyes with water for at least 15 minutes, while holding eyelids open. Consult a physician.

Ingestion: If ingested seek immediate medical attention. Do not induce vomiting unless instructed to do so by medical personnel. Never give anything by mouth to an unconscious person.

Inhalation: If exposure by inhalation is suspected, use proper respiratory protection to immediately move exposed individual to fresh air. Consult physician regarding any continued discomfort.

5. FIRE FIGHTING MEASURES

General Fire Hazards

No recognized fire hazards associated with the finished product. Take measures against electrostatic charge. Dust in sufficient concentration can result in an explosive mixture in air. Handle to minimize dusting and eliminate open flame and other sources of ignition.

Upper Flammable Limit (UFL): Not determined

Lower Flammable Limit (LFL): Not determined

Method used: DIN EN 51758

Flash Point: >200°C

Flammability Classification: Not determined.

Auto Ignition: >400°C. Method: VDI 2263 (D) Fine dust/median 50 micron.

Hazardous combustion products: On thermal decomposition oxides of carbon and nitrogen.

Suitable extinguishing media: Dry chemical, foam, carbon dioxide, water fog.

Protective equipment for firefighters: Firefighters should wear full protective clothing including self-contained breathing apparatus. Very slippery conditions are created if spilled product comes in contact with water.

NFPA Ratings: Health: 1 Fire: 0 Reactivity: 0 Other: B

Hazard Scale: 0=minimal 1=slight 2=moderate 3=serious 4=severe

6. ACCIDENTAL RELEASE MEASURES

Containment Procedures: Vacuum up product that is spilled. CAUTION- spilled material in contact with water creates very slippery conditions. Place waste in a labeled container.

Methods for cleaning up: None specified.

Evacuation procedures: Isolate area. Keep unnecessary personnel away.

Special procedures: Remove spills promptly as they may make floors slippery. Absorb any wet product with vermiculite or other inert material. Several washes and/or use of detergents may be necessary to completely clean any spill.

7. HANDLING AND STORAGE

Handling: Handle as an irritant. Avoid contact with eyes, skin and clothing. When dust is formed ensure sufficient workplace ventilation. Take measures against electrostatic charge. The product itself is not explosive; however, fine dust may form explosive mixture in air. Avoid deposition of dust.

Storage: Store product in a cool, dry area. Keep containers tightly closed.

8 EXPOSURE CONTROLS/PERSONAL PROTECTION

Component Exposure Limits: No information is available.

Engineering controls: Provide mechanical ventilation to prevent dust concentrations, and to reduce potential exposure to workers.

Personal protection equipment

Respiratory protection: Ventilation should be sufficient to effectively remove and prevent buildup of any dusts or fumes that may be generated during handling or thermal processing. If significant dusting occurs, use a NIOSH approved respirator.

Skin Protection: Skin contact should be minimized. Impervious gloves (rubber or neoprene) are recommended.

Eye protection: Safety glasses with side shields or goggles or face mask.

Hygiene measures: CAUTION: Extreme slipping hazard when wet. Obey reasonable safety precautions and practice good housekeeping. Before eating, drinking or smoking, wash face and hands thoroughly with soap and water.

7. PHYSICAL AND CHEMICAL PROPERTIES

Form:	powder
Color:	white granular
Odor:	odorless
pH:	~7-8@ 10g/l (20°C)
Solubility (H ₂ O):	Limited solubility
Evaporation Rate:	N/A
Melting Point:	N/A
Vapor Density:	N/A
Bulk Density:	44 lbs/cuft ³
Vapor Pressure:	N/A
Flash point:	>200°C (DIN EN 22719)

8. STABILITY AND REACTIVITY

Stability: Stable under usual application conditions.

Conditions to Avoid: Avoid wet and humid conditions.

Hazardous Decomposition Products: None identified.

Hazardous Polymerization: Will not occur.

9. TOXICOLOGICAL INFORMATION

Acute and chronic toxicity

General Product Information:

Acute Oral:	LD50 Rat Dose: >1200mg/kg Method: preliminary investigation
Acute Oral:	LD50 Mouse Dose: >5000mg/kg Method: preliminary investigation
Skin irritation:	No irritative
Eye irritation:	Result: Very slight eye irritation Particle effect
Sensitization:	Guinea pig Result: 0% (0/20) Method: OECD 406 No sensitization

Further Information: Based on knowledge of the properties of the components, adverse effects on human health are not to be expected in normal use.

Carcinogenicity

A: General Product Information

NTP: No
IARC: No
OSHA: No

B. Component Carcinogenicity

No information is available.

10. ECOLOGICAL INFORMATION

Ecotoxicity

General Product information

Biodegradability:	Due to its high polymer structure, the biodegradation of the product is negligible.
Physico-chemical Removability:	Because of its specific substantively, the product can be eliminated well in biological waste effluent treatment plants (binding on digestive sludge)
Toxicity to algae:	EC50 <i>Desmodesmus subspicatus</i> ~26 mg/l Method: OECD 201
Bacterial toxicity:	<i>Ps.putida</i> EC50 >1600 mg/L Exposure time 24 hour Method OECD DEV L 8

Toxicity to Daphnia magna: EC50 Daphnia magna
~300 mg/l
Exposure time: 48 hours
Method: OECD 202

Fish Toxicity: LC50 Danio rerio
~160 mg/l
Exposure Time: 96 hour
Method: OECD 203

Fish Toxicity Leuciscus idus
LC50 >140 mg/l
Exposure time: 96hours
Method: OECD 203

Earthworm Toxicity: Eisenia Foetida
LC50>1000mg/kg
Method: OECD 207

Further info: Prevent concentrated product from penetrating into waters without biological waste water treatment.

Environmental fate: Data reported in section 11 and 12 have been determined on a comparable product in the laboratory for Toxicology and Ecology

13. DISPOSAL CONSIDERATIONS

General Product Information: Incinerate or dispose of solidified product according to local, state and federal regulations. Unadulterated product is considered non-hazardous.

Component Waste Numbers: No EPA Waste Numbers are applicable for this product's components.

Disposal Instructions: Contain and collect using absorbent material if needed. Place collected material into suitable containers for proper disposal. Clean up and dispose of waste in accordance with all federal, state, and local environmental regulations.

14. TRANSPORT INFORMATION

International Transportation Regulations

This product is not regulated as a hazardous material by the United States (DOT) or Canadian (TDG) transportation regulations.

15. **REGULATORY INFORMATION**

US Federal Regulations

General Product Information

This product is not federally regulated as a hazardous material.

Clean Air Act

No information is available.

State Regulations:

General Product Information

Component Analysis – state

This product contains <0.10% residual acrylamide (CAS# 79-06-1), and the following states recognize acrylamide as a carcinogen or suspected carcinogen: CA (Prop 65), MA, MN, NJ, and PA.

California Proposition 65:

The following statement is made in order to comply with California Safe Drinking Water and Toxic Enforcement Act of 1986: This product contains the following substances (S) known to the State of California to cause cancer:

<u>Component</u>	<u>CAS#</u>
Acrylamide	79-06-1

<u>New Jersey RTK Label Information</u>	
Acrylamide	79-06-1

<u>Pennsylvania RTK Label Information</u>	
Acrylamide	79-06-1

Component Analysis – WHMIS IDL

No components are listed in the WHMIS IDL.
