**6. ACCIDENTAL RELEASE MEASURES**

**Personal precautions, protective equipment and emergency procedures**

For personal protection see Section 8. Avoid contact with skin, eyes and clothing. Where the exposure level is not known, wear approved, positive pressure, self-contained respirator. Where the exposure level is known, wear approved respirator suitable for the level of exposure.

**Environmental precautions**

**Methods and materials for containment and cleaning up**

Sweep up to prevent slipping hazard. Soak up with inert absorbent material. Take up mechanically and collect into suitable containers for disposal. Flush with water. Use detergent if needed.

**7. HANDLING AND STORAGE**

**Precautions for safe handling**

Handle in accordance with good industrial hygiene and safety practice. Avoid contact with eyes, skin and clothing. Do not eat, drink or smoke when using this product. If potential for exposure exists refer to Section 8 for specific personal protective equipment.

**Conditions for safe storage, including any incompatibilities**

Store at room temperature in the original container. Flashpoint determination was performed using a Pensky Martens type closed cup method. The method indicates a flash point greater than 93.3 °C (200°F). Although there was no flashpoint detected below 93.3 °C (200°F) some flammable vapours were evolved during the test as evidenced by the enlargement of the flame. Therefore caution should be exercised during storage and handling.

**Materials for packaging**

Unsuitable material: To avoid product degradation and equipment corrosion, do not use iron, copper or aluminum containers of equipment.

**Material to avoid:**

Strong oxidizing agent.

Storage stability:
